

C-ROME: Tours and art experiences in Rome, with a particular focus on places and walks in the city, which we believe are striking and insightful, from both a historic and urban point of view.

For this reason, we like to call them "experience" tours, offering more than one perspective of the city and its history. Our offer comprises historic and "off the beaten track" tours, sketching sessions, as well as our very popular "A 2000 Years walk" which takes visitors through more than 20 centuries of history, across the most important historical periods of Rome: art and architecture, religion and politics.

Our tours and drawing sessions offer the opportunity of observing the evolution of this unique city, from its origins to the current challenges, presented through some of its most iconic sites.

You may find more details on our web site <https://c-rome.com/>

Tours and drawing sessions are available in both English and Italian and may also be customized, should visitors have specific requests.

Don't miss your chance to see and discover Rome with us, in more than one way!
