

## **GYM LAB PERSONAL TRAINING**

**BECOME THE BEST VERSION OF YOU**

Viale degli Astri, 24, 00144 Roma RM, Italia

**GymLab is not a typical major gym's weight room, but a “Personal Training Office”.  
The place where you can forget about confusion and endless queues of people waiting for gym  
equipment, because in our weight room you are completely alone!**

**You have an entire hour from a professional trainer dedicated entirely to you, where you will  
receive all the attention needed during the exercises for the correct execution of every single  
movement and proper posture.**

## OUR 'FITNESS' VISION

The importance of 'posture' is at the base of our philosophy. To make a mistake in performing an exercise, and above all to hurt oneself, is very easy! The postural aspect is definitely underestimated, while it should be instead at the base of our daily life as it is simply fundamental! Practicing physical activity with certain criteria will allow you not only to feel stronger and fit, but above all to eliminate all those back and joint pains that have been haunting you throughout the day.

Practicing any kind of sport means you are moving....

Life is movement, and it's only in your hands!
